

[MeterOn: Key Functions](#)[1]

Want to see an improved taxi service? The solution is now in your hands!

The MeterOn mobile application is designed to assist the public to check and verify the status of a taxi driver before starting their journey. By simply entering the vehicle registration number, passengers can authenticate a driver, check current offences, and view other passengers' feedback and their taxi experiences.

With MeterOn, taxi users can track their journey, estimate the fare, and send SOS alerts in case of an emergency. A report can be lodged by the passenger if the taxi driver commits an offence.
